Daniels' Quality Strawberry Plants

The Everbearing Strawberries

PROGRESSIVE

The best, most prolific and highest in quality of the everbearers. Bears two crops a year, one in the spring, earlier than the standard June fruiting varieties, thus bringing the highest prices, and the other starting late in July and lasting all the rest of the summer and fall. It is the one best general utility berry. No planting is complete without it. Plants set this spring will bear this summer and fall. Don't let another summer go by without providing yourself with this delicious strawberry from your own garden.

25 for \$0.90; 100 for \$2.00; 1,000 for \$15.00

SUPERB

The largest and most attractive of the Everbearers. Does not yield as many berries as Progressive, but the fruits are larger and of a beautiful round form and glistening dark red color. In late June the Superb fruits heavily and because of their large, uniform size and attractive color they top the market.

25 for \$1.00; 100 for \$2.50

DULUTH

(Minn. No. 1017)

Originated at the Minnesota State Fruit Breeding Farm. A heavy yielder in both Spring and Fall. Berries are of good size, but not as attractive as the Superb. Flavor fine. In some localities has proven our best Everbearer. Many growers prefer this to the June fruiters for the main Spring crop because of its heavy yield at that time. The Fall crop of the second year is especially good.

25 for \$1.00; 100 for \$2.50

The June Fruiting Strawberries

PREMIER

Early. One of the best and most widely grown of the early strawberries. Starting ahead of the Dunlap and other main season varieties, it commands the highest prices. The blossoms are unusually resistant to frost and usually less injured by it than are later fruiting varieties. Although it ripens extra early, its season is long and the berries maintain good size to the last picking. Very heavy yielder of large dark red berries.

25 for \$0.65; 100 for \$1.50; 1,000 for \$10.00

DUNLAP

Midseason. Dunlap needs no introduction, as it is probably the best known berry there is. Sometimes called "The Standard Strawberry." Does well everywhere and is a regular producer of large crops. Good market and home garden berry.

25 for \$0.50; 100 for \$1.15; 1,000 for \$7.00

GIBSON

Midseason. Starts fruiting with the Dunlap but produces longer. A strong grower, deep rooted and a good drouth resister. Extremely heavy yielder of dark glossy red berries of excellent quality. Has replaced Dunlap in many sections.

25 for \$0.55; 100 for \$1.25; 1,000 for \$8.00

NOKOMIS

(Minn. No. 489)

Midseason. One of the newest and most important creations of our great State Fruit Breeding Farm. A berry especially designed for home gardens and local markets. A BERRY IN WHICH HIGH QUALITY, LARGE SIZE AND PRODUCTIVE ABILITY REIGN SUPREME. A BERRY IN WHICH THE FINEST QUALITIES HAVE NOT BEEN SACRIFICED FOR MARKETABILITY. Hardy and a very vigorous grower. Fruit extremely large and easily picked. Every home gardener will want this new berry and all will welcome the opportunity to get such valuable stock at our reasonable price. Our plants are from stock that came direct from the State Fruit Breeding Farm, were grown with great care on an especially prepared soil and are of the highest possible quality.

25 for \$1.00; 100 for \$2.50; 1,000 for \$20.00

MINNEHAHA

(Minn. No. 935)

Late. We consider this our most profitable June bearing variety. It is at its best just after the heaviest picking season, at a time when other berries are getting poor, when pickers are tired, and when prices for good fruit are going up again. Then turn your pickers into MINNEHAHA! You no longer have a picking problem, for one can pick more quarts of MINNEHAHA in an hour than of any other variety we have ever grown. The berries are exceedingly large, easy to pick, firm (even in wet weather) and will keep in good picking condition on the vines for three or four days. They hold their large size well to the end of the season. The quality when well ripened is excellent. They are apparently almost free from the attacks of the Strawberry Weevil. You can't make a mistake in planting this variety. We plant about three-quarters of all our fruiting beds of June bearing varieties to MINNEHAHA. Try it!

25 for \$0.65; 100 for \$1.50; 1,000 for \$10.00

Daniels' Quality Bush Fruit Plants

LATHAM RED RASPBERRY

(Minn. No. 4)

Latham was originated at the State Fruit Breeding Farm a few years ago and is now the most popular raspberry in the northwest and rapidly replacing older varieties because of its extreme hardiness and great productivity. It withstands the winters without any protection nearly everywhere. The canes are strong and vigorous and able to support their heavy load of fruit better than can most raspberries. Fruit is very large, easily and rapidly picked, of high quality and produced in great abundance. Brings a premium of 50c to \$1.00 over other varieties on the market. The one best raspberry for home or market use.

12 for \$1.00; 25 for \$1.50; 100 for \$5.00; 1,000 for \$10.00

KING RED RASPBERRY

King is about a week earlier than Latham. The leading early berry of the old reds and until the advent of the Latham was the most widely grown variety in Minnesota. It ripens early, is an easy picker and a good shipper. It is still popular with many growers in spite of the fact that it is not as hardy as Latham.

12 for \$0.75; 25 for \$1.25; 100 for \$3.50

ST. REGIS RED RASPBERRY

The Everbearing Raspberry

The best everbearing raspberry for the northwest. Bears two crops a year. Plants set this spring will bear this fall. The spring crop is very early,—a good market point,—and late summer brings a second crop which lasts until freezing. The berries are bright crimson and of high quality. No home garden is complete without this fall fruiting raspberry. Absolutely hardy.

12 for \$0.90; 25 for \$1.40; 100 for \$4.25

CUMBERLAND BLACK RASPBERRY

At present the most popular of the Black Raspberries. The plants are very productive and the fruit large, firm jet black, and of extra fine quality. Called by many the "Business Blackcap."

12 for \$0.90; 25 for \$1.40; 100 for \$4.25

PLUM FARMER BLACK RASPBERRY

Earlier than the Cumberland. Quality fine and the berries are large, firm and good shippers. Healthy, vigorous grower. Preferable to Cumberland where earliness is desired. Good for home or market use.

12 for \$0.90; 25 for \$1.40; 100 for \$4.25

BETA GRAPE

The "standard" hardy grape for the Northwest. A heavy annual bearer. As hardy as the wild grape, but produces enormous crops of medium size, black fruit of good quality that ripens so early that it can be grown far north. Easily grown and free from pests. An essential part of any home garden and wonderfully profitable as a commercial crop. Its fruit brings high price; the demand is greater than the supply, and is increasing every year. A vineyard of Beta is a permanent investment that will prove lasting and highly profitable. Our plants are extra fine and our prices unusually reasonable.

Each, \$0.25; 12 for \$2.75; 25 for \$5.00; 100 for \$18.00

(NOTE—Due to the prevailing high profit in grape growing the demand for plants has been strong and we sold so heavily last fall that our remaining stock is small. Therefore, to best serve our customers' interests, we will limit individual Beta orders to 500 plants,—and urge early ordering to avoid disappointment.)

CARRIE GOOSEBERRY

The most popular gooseberry for Minnesota and adjoining states. The berry is of good size and the plant a prolific yielder. Perfectly hardy. The foliage is free from the diseases that do such serious damage to most varieties. Carrie is often called the "Thornless Gooseberry" because of its relative freedom from thorns.

Each, \$0.30; Per Dozen, \$3.00

PERFECTION CURRANT

Perfection is the leading red currant for home use. As a commercial berry it also ranks high, for its large, attractive fruit is insurance that it will top the market. It yields freely, good-sized bunches of large, bright-red berries.

Each, \$0.20; Per Dozen, \$2.00

VICTORIA RHUBARB

The most all-round satisfactory, perennial vegetable. Year after year from earliest spring until late fall fresh stems may be pulled, and the roots may be forced in the cellar in winter time. Pieplant, or Wineplant, as it is sometimes called, is a plant of many uses. Delicious, health-giving sauces may easily be prepared from it. Pies that are second to none make it a popular vegetable with the pastry-loving folk, and by some it is used as a source of satisfying beverages. Every garden should have at least one dozen of our strong roots.

6 for \$0.75; 12 for \$1.00; 25 for \$1.75; 100 for \$6.00

CONOVER'S COLOSSAL ASPARAGUS

Gives the earliest and most cherished garden greens each year and may be used from early spring until late in June. Conover's Colossal is the best known variety there is, as it is one of the oldest,—and still heads the list. We offer strong, vigorous plants.

12 for \$0.50; 25 for \$0.90; 50 for \$1.50; 100 for \$2.00

THE DANIELS NURSERY . . . Long Lake, Minnesota

We exercise the utmost care in labeling and packing our plants and guarantee them to be true to name and correctly counted, and will replace free of charge any which prove to be otherwise. In no case will we be liable for more than the original cost of the plants. We deliver plants to the transportation company in first-class condition and cannot be held responsible for damage to them after that time, nor for inability to make delivery because of strikes, act of nature, or other causes beyond our control.

DANIELS' UTILITY PLANTS

PLANTS OF PRODUCTIVE USEFULNESS

To our old customers it is not necessary to say anything by way of introduction. We thank you for your past patronage and trust that we may continue to serve you. To our new acquaintances we will simply say that we are glad our little circular has found its way into your hands for we are certain that it will prove of value to you.

We list herein what we call UTILITY PLANTS,—plants every one of which will be of use to you in the production of high quality fruits and vegetables. No home garden is complete without some of each of them. Every one of them will be a dividend-payer,—whether in food for home use or in cash returns.

We want to supply your needs for UTILITY PLANTS. There are several reasons why we believe it will be to your advantage to order from us. We have carefully studied the needs of the fruit grower and home-garden planter and have devoted our energies to filling them. The following facts,—results of our specialization and up-to-date methods of growing and selling—should be of paramount interest to all planters:

1. Through our scientific methods of propagating and growing we have succeeded in producing plants of highest quality.

2. Our specialization and large scale production lower growing cost and our method of selling direct to planter eliminates intermediate expenses and agents' profits, so that our prices are as low as is possible consistent with the cost of producing dependable, high quality stock.

3. Plants reach our customers in the best possible condition, as they are shipped direct to the planter from us, eliminating the usual opportunity for drying out or other deterioration.

4. Chances for mixing or substitution are obviated as there is no intermediate handling of plants.

5. We grow only a few varieties, ones which are universally successful and which we unqualifiedly recommend to our customers.

6. We are centrally located and shipments reach all parts of the northwest in a few hours.

7. With our plants goes our service,—a service of the kind that counts,—and lasts as long as you will use it.

Above are summarized the reasons why we think it is to your interest to buy from us,—reasons which are sound and will appeal to all those who use their better judgment when buying plants.

Now is the time to order while our variety list is still unbroken, and your plants will be shipped to reach you when you want them, when planting conditions are right.

We want your order not only this year, but we want it in the succeeding years as well,—and we are glad to let the high-quality of the plants you get from us this year and the service that goes with them determine whether or not you buy from us in the future. We are confident that you will.

Every year we are sold out on certain varieties before the season is over. This year we will run short in some varieties, so suggest ordering early while our stock is complete.

THE DANIELS NURSERY

SPECIAL 1922 OFFER

As an inducement to early ordering, and to more rapidly introduce the wonderful new strawberry, NOKOMIS, to our customers, we are pleased to make the following remarkable offer:

With all orders of more than \$5.00 that reach us before April 15th we will send free of charge, if you ask for them, plants of NOKOMIS strawberry to the value of 5% of your order; if your order comes before April 1st we will include plants worth 10% of the amount, and if it arrives before March 1st we will increase the free NOKOMIS plants to 15% of the total of your order.

We positively will not give any plants free with orders reaching us after April 15th. In case our supply of NOKOMIS becomes exhausted, we reserve the right to substitute Minnehaha, but will give NOKOMIS as long as we have any.

This is a truly wonderful offer as NOKOMIS plants are very scarce and in great demand.

INSTRUCTIONS TO PURCHASERS

TERMS are cash with order,—or, if you prefer, a deposit of one-fifth will hold any order of \$10.00 or more until April 1st, when balance must be paid.

SHIPPING SEASON. We begin field digging about April 15th and can ship plants promptly at any time from that date until May 30th. The earlier stock is planted the better will be the results. We do not ship strawberry plants in the fall.

FREE DELIVERY. We will prepay all delivery charges on orders made up entirely of plants paid for at the 100 (or higher) rate. Orders containing our Special Combinations or plants paid for at the thousand rate will go charges collect.

SERVICE. Our SERVICE DEPARTMENT is for your use. Write to it at any time that you need help in your planting or growing problems. It will be a pleasure for us to answer,—and we will see that you get your reply promptly, in time to help you.

QUARANTINE. The law prohibits shipments of Gooseberries or Currants to points west of Minnesota.

Write plainly, order early, and rest assured that you will have the best plants that money can buy.
